WORK EXPERIENCE

Vivial
Software Engineer
(January 2020 - Present)

- Develop CMS APIs (Node, Express) and UI (React, SCSS, CSS-Foundation) with cloud technologies (AWS) and search engines (Elasticsearch). I was part of the team responsible to make a new CMS app and recreate the existing functionality to manage clients' public content.

Truenorth
Sr. Software Developer I
(April 2019 - January 2020)

- Working with Puerto Rico government apps for managing insurance collections, using API (.Net Core) and UI (Angular, SCSS), and hosted in Azure. My main job was integrating the policy and payment information from a public-facing app to pay business insurance. I also worked with the migration of a new platform to manage government scholarships.

Marítima Dominicana
Sr. Software Developer
(June 2016 - April 2019)

- Develop finance and information systems backed by .Net Core and UI made with AngularJS/2+ Hosted on-premise and Azure. I was in charge to maintain a large codebase of the financial app (such as billing, collections, documentation, etc). Also, I developed a new mobile and web app for organizing and displaying cargo container warehouses.

ESC Group
Mobile Developer
(April 2015 - June 2016)

- Working with a new mobile application (Android) for the monitoring and control of the smart bulbs using the Zigbee protocol. I was responsible to build the APP for controlling the state of the lights, such as brightness, color, and events. I also created APIs on top of ASP.NET to fulfill the functionalities of the app.

EDUCATION

UNAPEC
Bachelor Degree in Software Engineering
(January 2017 - July 2020)
A+

Technological Institute of the Americas
Associate Degree in Mechatronic Technology
(December 2013 - August 2016)
A+
