Josbel Luna
Full-Stack Web Developer

I'm a full-stack software engineer passionate about building high-performant, accessible websites. Most experienced in front-end development using React and Angular, and with a good amount of experience in back-end development with NodeJS, Ruby on Rails, and .Net Core.

WORK EXPERIENCE

BairesDev (November 2020 - Present)
Full-Stack Engineer

Worked on the consumer site for an auto repair company located in San Francisco, CA. Helped the company to migrate and create new modules with new cutting-edge design, both in the backend (Ruby on Rails/GraphQL) and Front-End (React/Sass). Also, I helped the team in many other ways, such as optimizing web performance and accessibility, improving developer experiences and dev tools, etc.

Vivial (January 2020 - November 2020)
Software Engineer

- Developed CMS APIs (Node, Express) and UI (React, Sass) with cloud technologies (AWS) and search engines (Elasticsearch) for a 100-year marketing company located in Bloomington · MN. I worked on migrating both public and admin sites from legacy ones.

Truenorth (April 2019 - January 2020)
Sr. Software Developer

- Worked with the Puerto Rico Government for a website to manage insurance collections, using .Net Core as the backend and UI Angular for the front-end. My main job was integrating the policy and payment information from a public-facing app to pay business insurance. I also was part of the migration of a new platform to manage Government scholarships.

Marítima Dominicana (June 2016 - April 2019)
Sr. Software Developer

- Developed financial and information websites made with .Net Core and AngularJS/2+ for a local shipping company. I maintained a large code base of apps, including billing, collections, documentation, etc. Also, I developed a new mobile and web application to organize and display cargo container warehouses.

ESC Group (March 2015 - June 2016)
Mobile Developer

- Develop mobile apps (Android) for monitoring and controlling smart bulbs. I also created APIs on top of ASP.NET to fulfill the app functionalities.

EDUCATION

UNAPEC (January 2017 - July 2020)
Bachelor's Degree in Software Engineering — A+

Technological Institute of the Americas (December 2013 - August 2016)
Associate Degree in Mechatronic Technology — A+
